

ENVIRONMENTAL MANAGEMENT SOLUTIONS

WORKING TOWARDS A SUSTAINABLE FUTURE

As a family-owned business, with more than 190 sites and branches across Australia and New Zealand, Kennards Hire is aware of the position we hold in the marketplace and the commitment we have to future generations to be an environmental leader in our industry.

From large industry partners to small businesses, Kennards Hire is witnessing more industry sectors driving for change, in their own capacity, to create a greener future. Kennards Hire is committed to facilitating positive environmental outcomes for the wellbeing of our people, our communities, and our customers.

MORE SUSTAINABLE CHOICES

Kennards Hire operates across multiple markets including DIY and home renovators, residential and non-residential construction, industrial and manufacturing services, civil engineering, government, and natural resources including water, oil, gas and mining.

We understand the need to conduct business in an environmentally responsible and sustainable way to prevent pollution, reduce reliance on natural resources, minimise environmental impact and continuously improve environmental management process and procedures.

Kennards Hire is driven to deliver measurable environmental and sustainable outcomes. To increase and maintain environmental awareness, the business is committing to integrating environmental considerations into all future operational and financial planning

OUR COMMITMENTS

As a leader in our field, we strive to 'Take Hire Higher'. We continue to investigate and invest in technologies that help both ourselves and our customers measure and minimise our effect on the environment. These include telemetry, monitoring devices and ongoing investigation into product ranges that use batteries, solar and alternate fuel sources.

To achieve this, Kennards Hire will:

- Act in accordance with all applicable environmental regulations and laws across all levels of government.
- Be an environmentally responsible neighbour in the communities in which we operate.
- Address non-compliance concerns and correct conditions that endanger health, safety, the environment.
- Ensure the responsible use of energy and improvement of energy efficiencies by implementing energy conservation initiatives throughout our business.
- Reduce our reliance on natural resources through the implementation of water saving initiatives.
- Regularly review our operations to minimise waste generation, and improve recycling and reuse opportunities wherever possible.
- Adopt pollution prevention and minimisation practices across our network of operations including air quality, dust suppression and noise control.

- Continuously review and update our environmental management processes, objectives and targets including environmental disaster mitigation strategies, with regular reports provided at both the Senior Leadership Team and Kennards Hire board levels.
- Actively source environmentally sustainable end-of-life solutions for all relevant products.
- Implement innovations and technological solutions to reduce our environmental footprint wherever possible.
- Incorporate active promotion of environmental awareness, providing access to opportunities to participate in awareness training and innovation process development.
- Assist our customers to achieve their emissions reduction targets through sophisticated monitoring, management and reporting of equipment use and the procurement of equipment products that support customer environmental outcomes (i.e. solar lighting towers, dust monitoring devices, etc.).
- Expect our suppliers and contractors operate in an environmentally responsible manner.

Kennards Hire is committed to an environmental focus across all business activities.

Kennards Hire provides a range of efficient and sustainable equipment solutions to support greener projects.

ENVIRONMENT STANDARDS

There is a growing emphasis on monitoring of noise and dust to protect the environment.

Sound barrier fencing, silenced skid pumps, ride on battery scrubbers are all part of our range that helps minimise noise pollution on customer sites and projects.

Our portable dust monitors measure air quality and provide real-time logging of hazardous dust levels, including silica and asbestos.

READY FOR HIRE

Our robust maintenance program means that all our equipment is regularly and effectively serviced, ensuring the performance of our equipment is in top shape. This means our equipment operates at peak efficiency with less breakdowns ultimately resulting in lower emissions than owned assets.

Through efficient fleet scheduling, our delivery vehicles spend less time on the road helping to minimise carbon emission output

ENERGY EFFICIENT EQUIPMENT

From solar charged, battery powered, LED lighting towers to hybrid excavators, our equipment range assists customers in achieving on-site sustainability objectives.

ENVIRONMENTAL MANAGEMENT

Through advanced tracking, monitoring and reporting, EasyTrak enables environmental management and key performance metrics to enable decision making that reduces carbon outputs and identifies sustainable ways to run a project.
