# TRAFFIC SOLUTIONS FROM KENNARDS HIRE

## OUR EXPERTISE

Kennards Hire brings substantial experience across a range of industries and environments, from large infrastructure, government and rail projects through to road maintenance, utilities and events. We understand a positive traffic management outcome depends on a solid traffic plan that is unique for each project. This is why invest in our people and resources across safe work practice, innovation and skills to deliver efficient solutions for our customer's complex traffic needs.

## SAFETY COMPLIANCE

We are a proud member of the Traffic Management Association of Australia (TMAA), ensuring our work practices conform to the latest legislation, standards and best practice. We also operate compliant training and systems to provide quality product and service to our customers. We know that adjusting traffic flow to prevailing conditions is a common scenario, so our trailer-mounted, portable traffic lights, which are charged through solar energy, can safely manage traffic in those tight spots.

### WORK WITH THE TRAFFIC EXPERTS

## AN INTEGRATED SERVICE

For customers seeking both traffic management services and specialised traffic hire equipment, our team provides a single point of contact to manage your project from beginning to end. With a 24/7 call-out service, after hours problem solving and extensive equipment servicing after every hire, customers can be confident that our traffic solutions and equipment will keep your project moving, day and night. At the same time we are dedicated to providing afterhours help and problem solving, because we're guided by a work ethic that is second to none in the hire industry.

## TRAFFIC EQUIPMENT RANGE

Our range includes newly-released products-to-market across attenuators, VMS message and arrow boards, pedestrian and traffic barriers, safety and directional signs, cones, road plates, portable lighting towers, self-powered solar traffic signals, and more - all backed by expert support and on-site delivery.
